

Partner with
the experts for
a Successful
Cloud Strategy

For most organizations, choosing the correct cloud services partner can make all the difference **technically** and **financially**.

Partnering with Paragon Micro included benefits:

- Proven methodology for cloud adoption, migration, and on-going management.
- Simplified, easy to understand, cloud billing services. Understand what you are consuming and by whom.
- Analysis tools for continuous on-going cost optimizations of cloud services.
- Access to zero cost risk mitigation tools above and beyond native cloud tools.
- Possible funding for cloud POC and cloud expansion opportunities.

Additional Free Benefits to expect:

- Highly skilled technical Engineers and Architects
- Customized Technical and Strategic Whiteboard Sessions
- Best Practices
- Expert Cloud Insights
- Cloud Migration viability discussions

Overview

You can consume public cloud services directly without the need for a cloud services partner, but why would you want to miss out on all the exclusive benefits that Paragon Micro provides?! The first step to migrate your applications and data to the cloud is to see if your infrastructure and business is ready to make the move. The next step is to manage and maintain the cloud services you are investing in. That's where Paragon Micro adds even more value.

Many organizations have business lines that are adopting cloud services outside of traditional internal IT avenues. It's easy for those cloud services to get out of control from a management, security, and cost perspective. You need to get your hands around all of this with a cloud services partner who can really help.

A high volume of workloads and applications can be moved to Microsoft Azure and AWS or other public clouds. However, to assess, migrate, and manage workloads on public clouds is a complex task that involves hiring lots of expensive expertise. Partnering with Paragon Micro provides a comprehensive suite of services for assessment, setup, migration, and management of assets on Public Cloud infrastructure.

Major benefits included at **no additional cost** include discussions with experts, cloud services discovery tools, cost optimization tools & services, enhanced cloud health check tools, billing management oversight, and more.

Process

Paragon Micro's cloud services assignment is simple, easy, and costs nothing. Once Paragon Micro has **assigned** visibility and management of your new and existing cloud services from Azure and AWS we'll be able to provide your organization with all of these exclusive benefits at no charge so that your organization can have a successful cloud strategy and on-going management framework in place. Half the battle is getting there, the other half is ensuring that it stays reliable, secure, is easily managed, and stays cost effective in the long run.
