

 **Windows 11**

Embrace the Future with Windows 11: Leading the Era of the AI PC

In an era where artificial intelligence is not just an advantage but a necessity, **Windows 11** stands at the forefront of innovation.

Microsoft has pioneered the integration of Neural Processing Units (NPUs) within the Windows 11 platform, marking a transformative step in harnessing the power of generative AI applications and workloads directly on your device.

Advancing the Era of AI

Integrated AI & Improved Hardware Options

Windows 11 is designed to accelerate innovation, unlock productivity, and drive greater business impact. New hardware advances will help employees power their best work through elevated design elements, high-performance processors, AI-enhanced experiences, and top-tier device management and protection.

Discover the Power of AI with Copilot

Kickstart your Windows 11 experience. Along with other AI-powered features, Copilot can enhance your creativity and productivity. Start your next creative project with ideas and information that spark your ingenuity. Copilot AI-powered features gets you relevant answers fast, lets you ask follow-up questions, and can generate images from your ideas.

Cocreator

Everyone has an imagination and an ability to be an artist. Light your spark with Cocreator and generate artwork from your text and drawing prompts

Creative filters

Express yourself in new ways during video calls with creative filters, without having to download any new apps or plug-ins.

Windows Studio Effects

Improve lighting, cancel noises, and blur distractions in the background during video calls. When presentation matters, turn on Windows Studio Effects.

Live Captions

When you never miss a word, you never miss a beat. Get accurate subtitles in real time with automatic Live Captions.
