

 **Windows 11**

Team Connections with Integrated Communication in Windows 11

In the age of hybrid work, effective communication and collaboration have never been more critical.

Windows 11 takes a significant leap forward by deeply integrating Microsoft Teams and advanced communication tools directly into the operating system, enabling your teams to connect, collaborate, and share in more intuitive and effective ways than ever before.

Transform Team Connections

Communicate effectively at scale with company-wide announcements and virtual town halls while creating a feedback loop so your workers become your competitive advantage.

ENHANCE COMMUNICATIONS AND COLLABORATION

Connect deskless workers with the right people, tools, and knowledge to get their job done.

INCREASE OPERATIONAL EFFICIENCY

Automate tasks, industry processes, and schedule management with digital workflows and create a simple, easy-to-use unified platform for your workforce.

TRANSFORM EMPLOYEE EXPERIENCE

Empower frontline workers to engage in company culture, acquire new skills, and feel valued within your organization to increase employee retention and a sense of belonging.

SECURE AND MANAGE YOUR BUSINESS

Streamline experiences for deployment and identity management while protecting your business with built-in security and compliance across identities, emails, apps, and endpoints.
