

 **Windows 11**

## Simplify Your IT Operations: Deploy and Manage Windows 11 with Ease

As your organization navigates the evolving landscape of distributed workforces, the deployment and management of IT resources play a pivotal role in ensuring seamless operations and security.

Windows 11 is designed to streamline these processes, making it easier than ever to upgrade, deploy, and manage devices across your organization.

# Deploy & Manage With Ease

Windows 11 is not just an operating system; it's a powerful management tool that simplifies IT operations and enhances security across your digital environment. Embrace the future of IT management with Windows 11 and empower your team to work more efficiently and securely.

## An Update, Not an Upgrade

Deploy Windows 11 alongside Windows 10 without disrupting your IT infrastructure. Utilize zero-touch deployment for new devices and manage BYOD scenarios securely, ensuring your company data is protected across all devices.

## Seamless Migration and Compatibility

Prepare for a smooth transition to Windows 11 with over 99.7% application compatibility, ensuring your critical apps run without interruption. Our services are available to assist in planning your deployment and addressing any application compatibility issues, ensuring a hassle-free migration.

## Effortless Management

Manage Windows 11 using the tools you already own and trust. Windows Autopatch and other services that may be included in your subscription automate the upgrade and service process, allowing you to focus on strategic IT initiatives rather than routine maintenance.

## UNBOX AND GO - FROM THE GET GO

Layers of security like TPM 2.0 are built-in and enabled right out of the box—for a reported 3.1x reduction in firmware attacks and 2.8x fewer instances of identity theft.
